Nod Away is set on a near-future version of earth. A deep space transport has been developed to take a small crew to an earth-like, habitable planet in a nearby system in an attempt to begin colonization/repopulation. The internet is now telepathic and referred to as the "innernet." When the hub is revealed to be a human child, Melody McCabe is hired to develop the new nexus on the second International Space Station. Working within the structure of sci-fi, Nod Away moves back and forth between physical and psychological worlds, utilizing traditional and abstract storytelling styles to explore what consciousness could be, where it could possibly be located, and what function or point it might serve.
