Research Methods in Occupational Epidemiology (Monographs in Epidemiology and Biostatistics)

Harvey Checkoway, Neil Pearce, Douglas J. Crawford-Brown

Occupational epidemiology has emerged as a distinct subdiscipline of epidemiology and occupational medicine, addressing fundamental public health and scientific questions relating to the specification of exposure-response relationships, assessment of the adequacy of occupational exposure guidelines, and extrapolation of hazardous effects to other settings. This book reviews the wide range of principles and methods used in epidemiologic studies of working populations. It describes the historical development of occupational epidemiology, the approaches to characterizing workplace exposures, and the methods for designing and implementing epidemiologic studies. The relative strengths and limitations of different study designs are emphasized. Also included are more advanced discussions of statistical analysis, the estimation of doses to biological targets, and applications of the data derived from occupational epidemiology studies to disease modeling and risk assessment. The volume will serve both as a textbook in epidemiology and occupational medicine courses and as a practical handbook for the design, implementation, and interpretation of research in this field.

From reader reviews:

Lawanda Beverly:

Book is actually written, printed, or created for everything. You can learn everything you want by a publication. Book has a different type. As it is known to us that book is important thing to bring us around the world. Next to that you can your reading expertise was fluently. A guide Research Methods in Occupational Epidemiology (Monographs in Epidemiology and Biostatistics) will make you to possibly be smarter. You can feel much more confidence if you can know about every little thing. But some of you think which open or reading a new book make you bored. It is not make you fun. Why they can be thought like that? Have you trying to find best book or suited book with you?

Gale Taylor:

Nowadays reading books be a little more than want or need but also turn into a life style. This reading behavior give you lot of advantages. Associate programs you got of course the knowledge the particular information inside the book which improve your knowledge and information. The data you get based on what kind of guide you read, if you want drive more knowledge just go with training books but if you want truly feel happy read one along with theme for entertaining for example comic or novel. Typically the Research Methods in Occupational Epidemiology (Monographs in Epidemiology and Biostatistics) is kind of publication which is giving the reader unpredictable experience.

Graham Ayala:

Information is provisions for those to get better life, information presently can get by anyone in everywhere. The information can be a understanding or any news even a huge concern. What people must be consider whenever those information which is from the former life are difficult to be find than now could be taking seriously which one would work to believe or which one typically the resource are convinced. If you have the unstable resource then you have it as your main information there will be huge disadvantage for you. All those possibilities will not happen with you if you take Research Methods in Occupational Epidemiology (Monographs in Epidemiology and Biostatistics) as your daily resource information.

Carolyn Lew:

As a college student exactly feel bored to reading. If their teacher inquired them to go to the library or to make summary for some guide, they are complained. Just little students that has reading's soul or real their interest. They just do what the instructor want, like asked to the library. They go to right now there but nothing reading significantly. Any students feel that examining is not important, boring along with can't see colorful images on there. Yeah, it is to get complicated. Book is very important for you. As we know that on this period of time, many ways to get whatever you want. Likewise word says, ways to reach Chinese's country. So , this Research Methods in Occupational Epidemiology (Monographs in Epidemiology and Biostatistics) can make you experience more interested to read.
