Data Mining in E-learning (Advances in Management Information)

C. Romero (Editor)

Data Mining in E-learning (Advances in Management Information) C. Romero (Editor)

The development of e-learning systems, particularly web-based education systems, has increased exponentially in recent years. In the last years, researchers have begun to investigate various data mining methods to help teachers improve e-learning systems. These methods allow them to discover new knowledge based on students' usage data. Following this line, one of the most promising areas is the application of knowledge extraction. As one of the first of its kind, this book presents an introduction to e-learning systems, data mining concepts and the interaction between both areas. It consists of both openly solicited and invited chapters, written by international researchers and leading experts on the application of data mining techniques in e-learning systems. The main purpose of this book is to show the current state of this research area. It includes an introduction to e-learning systems, data mining and the interaction between areas, as well as several case studies and experiences of applying data mining techniques in e-learning systems.

From reader reviews:

David Hernandez:

In this 21st century, people become competitive in every single way. By being competitive right now, people have to do something to make these people survive, being in the middle of the actual crowded place and notice simply by surrounding. One thing that at times many people have underestimated the item for a while is reading. That's why, by reading an e-book your ability to survive boosts then having a chance to stay than other is high. For you personally who want to start reading a book, we give you this specific Data Mining in E-learning (Advances in Management Information) book as a basic and daily reading e-book. Why, because this book is greater than just a book.

Lewis Manns:

As people who live in the particular modest era should be up-to-date about what is going on or information even knowledge to make these people keep up with the era which can always change and move ahead. Some of you maybe will probably update themselves by examining books. It is a good choice for yourself but the problems coming to a person is you don't know what kind you should start with. This Data Mining in E-learning (Advances in Management Information) is our recommendation so you keep up with the world. Why, because this book serves what you want and need in this era.

Erin Weiss:

Reading a guide tends to be a new life style in this era of globalization. With studying you can get a lot of information which will give you benefit in your life. Together with books everyone in this world can easily share their idea. Ebooks can also inspire a lot of people. Lots of authors can inspire their very own reader with their story or maybe their experience. Not only situations that share in the textbooks. But also they write about the ability about something that you need an example of this. How to get the good score on toefl, or how to teach your children, there are many kinds of books that you can get now. The authors on this planet always try to improve their talent in writing, they also do some exploration before they write for their book. One of them is this Data Mining in E-learning (Advances in Management Information).

Joseph Fulkerson:

On this era which is the greater man or woman or who has the ability to do something more are more special than other. Do you want to become certainly one of them? It is just a simple approach to have that. What you are related to is just spending your time not very much but quite enough to get a look at some books. Among the books in the top list in your reading list is Data Mining in E-learning (Advances in Management Information). This book which can be qualified as The Hungry Incline can get you closer in turning into a precious person. By looking up and reviewing this e-book you can get many advantages.
