Concepts of Modern Mathematics (Dover Books on Mathematics) Ian Stewart

Some years ago, "new math" took the country's classrooms by storm. Based on the abstract, general style of mathematical exposition favored by research mathematicians, its goal was to teach students not just to manipulate numbers and formulas, but to grasp the underlying mathematical concepts. The result, at least at first, was a great deal of confusion among teachers, students, and parents. Since then, the negative aspects of "new math" have been eliminated and its positive elements assimilated into classroom instruction.

In this charming volume, a noted English mathematician uses humor and anecdote to illuminate the concepts underlying "new math": groups, sets, subsets, topology, Boolean algebra, and more. According to Professor Stewart, an understanding of these concepts offers the best route to grasping the true nature of mathematics, in particular the power, beauty, and utility of *pure* mathematics. No advanced mathematical background is needed (a smattering of algebra, geometry, and trigonometry is helpful) to follow the author's lucid and thought-provoking discussions of such topics as functions, symmetry, axiomatics, counting, topology, hyperspace, linear algebra, real analysis, probability, computers, applications of modern mathematics, and much more.

By the time readers have finished this book, they'll have a much clearer grasp of how modern mathematicians look at figures, functions, and formulas and how a firm grasp of the ideas underlying "new math" leads toward a genuine comprehension of the nature of mathematics itself.

From reader reviews:

Arlene Oliver:

Spent a free time for you to be fun activity to accomplish! A lot of people spent their spare time with their family, or their friends. Usually they performing activity like watching television, gonna beach, or picnic within the park. They actually doing ditto every week. Do you feel it? Will you something different to fill your personal free time/ holiday? May be reading a book may be option to fill your no cost time/ holiday. The first thing that you'll ask may be what kinds of reserve that you should read. If you want to try out look for book, may be the reserve untitled Concepts of Modern Mathematics (Dover Books on Mathematics) can be very good book to read. May be it might be best activity to you.

David Mathews:

Do you have something that you enjoy such as book? The e-book lovers usually prefer to pick book like comic, brief story and the biggest you are novel. Now, why not attempting Concepts of Modern Mathematics (Dover Books on Mathematics) that give your enjoyment preference will be satisfied simply by reading this book. Reading practice all over the world can be said as the opportunity for people to know world far better then how they react toward the world. It can't be explained constantly that reading habit only for the geeky man but for all of you who wants to possibly be success person. So , for all you who want to start reading through as your good habit, you could pick Concepts of Modern Mathematics (Dover Books on Mathematics) become your own personal starter.

Patrick Bergeron:

The book untitled Concepts of Modern Mathematics (Dover Books on Mathematics) contain a lot of information on it. The writer explains her idea with easy technique. The language is very straightforward all the people, so do not really worry, you can easy to read that. The book was written by famous author. The author gives you in the new period of literary works. You can easily read this book because you can keep reading your smart phone, or program, so you can read the book throughout anywhere and anytime. In a situation you wish to purchase the e-book, you can open their official web-site and order it. Have a nice examine.

Enrique Boggs:

This Concepts of Modern Mathematics (Dover Books on Mathematics) is completely new way for you who has attention to look for some information given it relief your hunger of information. Getting deeper you in it getting knowledge more you know or perhaps you who still having tiny amount of digest in reading this Concepts of Modern Mathematics (Dover Books on Mathematics) can be the light food for yourself because the information inside this kind of book is easy to get by anyone. These books produce itself in the form which is reachable by anyone, yes I mean in the e-book contact form. People who think that in e-book form make them feel tired even dizzy this reserve is the answer. So there is no in reading a publication especially

this one. You can find what you are looking for. It should be here for you actually. So , don't miss that! Just read this e-book sort for your better life and knowledge.
