Restoration of Lakes, Streams, Floodplains, and Bogs in Europe: Principles and Case Studies: 3 (Wetlands: Ecology, Conservation and Management)

Restoration of Lakes, Streams, Floodplains, and Bogs in Europe: Principles and Case Studies: 3 (Wetlands: Ecology, Conservation and Management)

Despite our growing awareness of the vital role they play in the global environment, wetlands remain among the most endangered ecosystems on Earth and are still being destroyed and degraded at an alarming rate. This much-needed publication, which includes contributions from leading researchers and practitioners, presents a holistic perspective on the restoration of wetland ecosystems such as shallow lakes, streams, floodplains and bogs. Through the use of carefully chosen case studies, the authors examine European wetland restoration projects from Scandinavia to Bulgaria and from Ireland to Belarus, focusing on the lessons they can teach to a new generation of conservationists. As well as reviewing the sum of current knowledge on the subject, the text is a store of practical know-how, covering a wide range of conservation approaches and techniques. It analyzes the major problems in the field and identifies key principles for achieving sustainability in wetland restoration. The topics covered include:

- the role of wetlands in landscape functioning
- human interference with natural processes such as water and matter cycles and energy dissipation
- the impact of land use on global problems such as climate change, floods and droughts
- the role played by diversity in wetland functioning

The work shows that without sustainable land use over the totality of their catchment areas, and without cohesive inter-agency cooperation, individual restoration projects will have a short life span. The balance between scientific background and practical restoration makes this book a valuable resource for scientists as well as wetland managers, decision makers and land use planners, as well as students of ecology, nature conservation and environmental protection.

From reader reviews:

Kara Corbett:

This Restoration of Lakes, Streams, Floodplains, and Bogs in Europe: Principles and Case Studies: 3 (Wetlands: Ecology, Conservation and Management) are generally reliable for you who want to be considered a successful person, why. The reason why of this Restoration of Lakes, Streams, Floodplains, and Bogs in Europe: Principles and Case Studies: 3 (Wetlands: Ecology, Conservation and Management) can be one of several great books you must have is definitely giving you more than just simple reading food but feed a person with information that possibly will shock your prior knowledge. This book will be handy, you can bring it everywhere and whenever your conditions both in e-book and printed people. Beside that this Restoration of Lakes, Streams, Floodplains, and Bogs in Europe: Principles and Case Studies: 3 (Wetlands: Ecology, Conservation and Management) forcing you to have an enormous of experience for example rich vocabulary, giving you demo of critical thinking that we realize it useful in your day activity. So , let's have it and enjoy reading.

Raymond Levine:

Reading a guide can be one of a lot of task that everyone in the world likes. Do you like reading book and so. There are a lot of reasons why people enjoy it. First reading a e-book will give you a lot of new information. When you read a reserve you will get new information due to the fact book is one of several ways to share the information or even their idea. Second, studying a book will make a person more imaginative. When you reading through a book especially fictional works book the author will bring one to imagine the story how the personas do it anything. Third, it is possible to share your knowledge to other people. When you read this Restoration of Lakes, Streams, Floodplains, and Bogs in Europe: Principles and Case Studies: 3 (Wetlands: Ecology, Conservation and Management), you are able to tells your family, friends and also soon about yours book. Your knowledge can inspire average, make them reading a publication.

Marcia Eberhart:

Restoration of Lakes, Streams, Floodplains, and Bogs in Europe: Principles and Case Studies: 3 (Wetlands: Ecology, Conservation and Management) can be one of your starter books that are good idea. We recommend that straight away because this book has good vocabulary that can increase your knowledge in terminology, easy to understand, bit entertaining but nevertheless delivering the information. The author giving his/her effort to put every word into satisfaction arrangement in writing Restoration of Lakes, Streams, Floodplains, and Bogs in Europe: Principles and Case Studies: 3 (Wetlands: Ecology, Conservation and Management) nevertheless doesn't forget the main position, giving the reader the hottest in addition to based confirm resource data that maybe you can be among it. This great information can easily drawn you into new stage of crucial pondering.

Margaret Velasquez:

Your reading sixth sense will not betray you, why because this Restoration of Lakes, Streams, Floodplains, and Bogs in Europe: Principles and Case Studies: 3 (Wetlands: Ecology, Conservation and Management) reserve written by well-known writer who really knows well how to make book which might be understand by anyone who have read the book. Written with good manner for you, still dripping wet every ideas and publishing skill only for eliminate your personal hunger then you still doubt Restoration of Lakes, Streams, Floodplains, and Bogs in Europe: Principles and Case Studies: 3 (Wetlands: Ecology, Conservation and Management) as good book not only by the cover but also by content. This is one reserve that can break don't assess book by its handle, so do you still needing a different sixth sense to pick that!? Oh come on your reading through sixth sense already told you so why you have to listening to yet another sixth sense.
