## **Neurobiology of Feeding and Nutrition** Jacques Magnen

Neurobiology of Feeding and Nutrition focuses on feeding as the behavior of primal survival. This book discusses the sensory, brain, and endocrine involvement in the behavioral and nutritional regulatory processes.

Organized into 12 chapters, this book starts with an overview of the initial survey of works on the normal feeding of an animal model with emphasis on the basic periodicity of the behavior and the significance of this behavior. This text then explores the overall stimulation to eat, which results from the combination of sensory and systematic stimuli. Other chapters examine the other compounds of the stimulation to eat and discuss the targets of the systematic stimulus to eat or not to eat. This book describes as well the general organization of sensory projection in the central nervous system. The final chapter deals with the ontogeny of feeding behavior from birth to adulthood.

This book is a valuable resource for scientists and technologists interested in feeding and nutrition.
