**Solar Cells: Materials, Manufacture and Operation** Tom Markvart, Luis Castaner

The capture and use of solar energy has been growing for many years, but only in recent times have advances in design and manufacture allowed us to see the incorporation of solar energy as a significant player in the renewable energy arena.

Solar cells are at the heart of any photovoltaic system and in this book the various types are described and their characteristics reviewed.

Going beyond materials, design and function, 'Solar Cells' also covers their testing, monitoring and calibration thus providing a comprehensive account of current activity in this important field of research and industry.

'Solar Cells' has been abstracted from the recent 'Practical Handbook of Photovoltaics' by the same editors (ISBN 185617 3909. 2003: Elsevier)

Internationally-respected contributors from industry and academia  
Abstracted from 'The Practical Handbook of Photovoltaics' by the same Editors  
A comprehensive source-book on all aspects of solar cells

### **From reader reviews:**

#### **Gilbert Johnson:**

Nowadays reading books are more than want or need but also be a life style. This reading habit give you lot of advantages. The benefits you got of course the knowledge even the information inside the book that improve your knowledge and information. The details you get based on what kind of book you read, if you want have more knowledge just go with education and learning books but if you want experience happy read one along with theme for entertaining such as comic or novel. The particular Solar Cells: Materials, Manufacture and Operation is kind of reserve which is giving the reader unpredictable experience.

#### **Mary Clark:**

Spent a free the perfect time to be fun activity to do! A lot of people spent their down time with their family, or all their friends. Usually they performing activity like watching television, likely to beach, or picnic in the park. They actually doing same task every week. Do you feel it? Do you want to something different to fill your current free time/ holiday? Might be reading a book may be option to fill your free of charge time/ holiday. The first thing you will ask may be what kinds of guide that you should read. If you want to consider look for book, may be the guide untitled Solar Cells: Materials, Manufacture and Operation can be good book to read. May be it can be best activity to you.

#### **David Hernandez:**

Exactly why? Because this Solar Cells: Materials, Manufacture and Operation is an unordinary book that the inside of the guide waiting for you to snap that but latter it will shock you with the secret it inside. Reading this book beside it was fantastic author who have write the book in such awesome way makes the content inside of easier to understand, entertaining way but still convey the meaning thoroughly. So , it is good for you because of not hesitating having this any longer or you going to regret it. This phenomenal book will give you a lot of positive aspects than the other book have got such as help improving your proficiency and your critical thinking technique. So , still want to delay having that book? If I had been you I will go to the publication store hurriedly.

#### **Laurie Riley:**

Your reading sixth sense will not betray an individual, why because this Solar Cells: Materials, Manufacture and Operation book written by well-known writer who really knows well how to make book that may be understand by anyone who have read the book. Written within good manner for you, still dripping wet every ideas and publishing skill only for eliminate your personal hunger then you still hesitation Solar Cells: Materials, Manufacture and Operation as good book not merely by the cover but also from the content. This is one guide that can break don't determine book by its handle, so do you still needing yet another sixth sense to pick this specific!?! Oh come on your studying sixth sense already alerted you so why you have to listening to one more sixth sense.
