Foundation of Structural Geology R G Park

Since the first edition was published in 1983, this highly-regarded introductory textbook has been used by many generations of students worldwide. It is specifically tailored to the requirements of first or second year geology undergraduates.

The third edition has been extensively revised and updated to include many new sections and over 50 new or redrawn illustrations. There are now over 220 illustrations, many incorporating a second colour to highlight essential features. The format has been changed to enhance the visual attractiveness of the book.

The tripartite organization of the first and second editions has been modified by combining the purely descriptive or factual aspects of fault and fold structure in the earlier chapters with a simple treatment of mechanisms, leaving the more geometrically complex treatment until after the relevant sections on stress and strain, as before. Some subjects are introduced for the first time, e.g. inversion and orogen collapse, and others have been extensively modified, e.g. the chapter on gravity controlled structures now emphasises modern work on salt tectonics. The last third of the book is devoted to the wider context of geological structures and how they relate to plate tectonics. The final two chapters have been considerably expanded and give examples of various types of geological structures in their plate tectonic settings in both modern and ancient orogenic belts.

From reader reviews:

Elena Sparrow:

Do you have favorite book? Should you have, what is your favorite's book? Book is very important thing for us to find out everything in the world. Each publication has different aim or even goal; it means that reserve has different type. Some people feel enjoy to spend their time and energy to read a book. These are reading whatever they take because their hobby is reading a book. Why not the person who don't like reading through a book? Sometime, particular person feel need book if they found difficult problem or exercise. Well, probably you should have this Foundation of Structural Geology.

Marilyn Vance:

Playing with family within a park, coming to see the coastal world or hanging out with buddies is thing that usually you might have done when you have spare time, then why you don't try point that really opposite from that. Just one activity that make you not experiencing tired but still relaxing, trilling like on roller coaster you are ride on and with addition of information. Even you love Foundation of Structural Geology, it is possible to enjoy both. It is fine combination right, you still desire to miss it? What kind of hang type is it? Oh can occur its mind hangout people. What? Still don't buy it, oh come on its called reading friends.

Jody Tolar:

In this time globalization it is important to someone to get information. The information will make professionals understand the condition of the world. The fitness of the world makes the information better to share. You can find a lot of referrals to get information example: internet, paper, book, and soon. You can see that now, a lot of publisher that print many kinds of book. The particular book that recommended to your account is Foundation of Structural Geology this publication consist a lot of the information from the condition of this world now. This book was represented just how can the world has grown up. The terminology styles that writer use for explain it is easy to understand. The particular writer made some investigation when he makes this book. That is why this book acceptable all of you.

Leslie Bennett:

A lot of book has printed but it is different. You can get it by world wide web on social media. You can choose the most beneficial book for you, science, comic, novel, or whatever by searching from it. It is called of book Foundation of Structural Geology. You'll be able to your knowledge by it. Without leaving the printed book, it may add your knowledge and make you happier to read. It is most important that, you must aware about reserve. It can bring you from one location to other place.
