Microsoft Log Parser Toolkit: A complete toolkit for Microsoft's undocumented log analysis tool

Gabriele Giuseppini, Mark Burnett, Jeremy Faircloth, Dave Kleiman

HIGHLIGHT

Written by Microsoft's Log Parser developer, this is the first book available on Microsoft's popular yet undocumented log parser tool. The book and accompanying Web site contain hundreds of customized, working scripts and templates that system administrators will find invaluable for analyzing the log files from Windows Server, Snort IDS, ISA Server, IIS Server, Exchange Server, and other products.

System administrators running Windows, Unix, and Linux networks manage anywhere from 1 to thousands of operating systems (Windows, Unix, etc.), Applications (Exchange, Snort, IIS, etc.), and hardware devices (firewalls, routers, etc.) that generate incredibly long and detailed log files of all activity on the particular application or device. This book will teach administrators how to use Microsoft's Log Parser to data mine all of the information available within these countless logs. The book teaches readers how all queries within Log Parser work (for example: a Log Parser query to an Exchange log may provide information on the origin of spam, viruses, etc.). Also, Log Parser is completely scriptable and customizable so the book and accompanying Web site will provide the reader with hundreds of original, working scripts that will automate these tasks and provide formatted charts and reports detailing the results of the queries.

* Written by Microsoft's sole developer of Log Parser, this is the first book available on the powerful yet completely undocumented product that ships with Microsoft's IIS, Windows Advanced Server 2003, and is available as a free download from the Microsoft Web site.

* The book and accompanying Web site contain dozens of original, working Log Parser scripts and templates for Windows Server, ISA Server, Snort IDS, Exchange Server, IIS, and more!

* This book and accompanying scripts will save system administrators countless hours by scripting and automating the most common to the most complex log analysis tasks.

From reader reviews:

William Coker:

Do you have favorite book? For those who have, what is your favorite's book? Reserve is very important thing for us to find out everything in the world. Each reserve has different aim or maybe goal; it means that e-book has different type. Some people experience enjoy to spend their time for you to read a book. They may be reading whatever they take because their hobby is usually reading a book. What about the person who don't like examining a book? Sometime, man feel need book when they found difficult problem or maybe exercise. Well, probably you will want this Microsoft Log Parser Toolkit: A complete toolkit for Microsoft's undocumented log analysis tool.

Blanche Ball:

Information is provisions for people to get better life, information currently can get by anyone at everywhere. The information can be a information or any news even a concern. What people must be consider when those information which is inside former life are challenging to be find than now's taking seriously which one works to believe or which one often the resource are convinced. If you receive the unstable resource then you obtain it as your main information we will see huge disadvantage for you. All those possibilities will not happen with you if you take Microsoft Log Parser Toolkit: A complete toolkit for Microsoft's undocumented log analysis tool as your daily resource information.

Paul Leavens:

Is it you who having spare time subsequently spend it whole day simply by watching television programs or just laying on the bed? Do you need something new? This Microsoft Log Parser Toolkit: A complete toolkit for Microsoft's undocumented log analysis tool can be the solution, oh how comes? The new book you know. You are consequently out of date, spending your spare time by reading in this brand new era is common not a geek activity. So what these publications have than the others?

Audrey Mack:

As a scholar exactly feel bored in order to reading. If their teacher asked them to go to the library in order to make summary for some reserve, they are complained. Just tiny students that has reading's heart or real their interest. They just do what the professor want, like asked to go to the library. They go to generally there but nothing reading really. Any students feel that reading is not important, boring and can't see colorful pics on there. Yeah, it is to get complicated. Book is very important for you. As we know that on this time, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. So , this Microsoft Log Parser Toolkit: A complete toolkit for Microsoft's undocumented log analysis tool can make you experience more interested to read.
