Human Friendly Mechatronics

Masaharu Takano, Eiji Arai, Tatsuo Arai

Human Friendly Mechatronics Masaharu Takano, Eiji Arai, Tatsuo Arai

The book includes 61 selected papers from 106 presented at the second International Conference on Machine Automation (ICMA2000). The conference focused, for the first time, on human friendly mechatronics which covers machine systems interacting with human beings, psychological, physiological, and physical behaviors of the human being itself, robotics, human-mimetic mechanical systems, commercial application examples and so on. Machine automation has owed a lot to mechatronics technology in the last decades, however, a paradigm shift is desired and emphasized in the 21st century in every aspect of our society, and mechatronics is not an exception. The paradigm shift in mechatronics is a pursuit of productivity and efficiency to the preference of humans, and it is time that a new concept of a human friendly robot must be proposed that is welcome by human users. The book aims to offer the most up-to-date and valuable information on:

- Human Interface & Communication
- Human Support Technology
- Actuator & Control
- Vision & Sensing
- Robotics and Design
- Manufacturing System

We believe this book will bring advanced knowledge and valuable information to the industries as well as to academics and will contribute to the further development in mechatronics and its related fields.

From reader reviews:

Gerald Kelly:

Book is to be different for every single grade. Book for children right up until adult are different content. As you may know that book is very important for all of us. The book Human Friendly Mechatronics ended up being making you to know about other knowledge and of course you can take more information. It is very advantages for you. The publication Human Friendly Mechatronics is not only giving you much more new information but also being your friend when you really feel bored. You can spend your own personal spend time to read your book. Try to make relationship using the book Human Friendly Mechatronics. You never truly feel lose out for everything if you read some books.

Lena Garcia:

The book Human Friendly Mechatronics will bring you to the new experience of reading some sort of book. The author style to elucidate the idea is very unique. If you try to find new book to see, this book very suited to you. The book Human Friendly Mechatronics is much recommended to you you just read. You can also get the e-book in the official web site, so you can more readily to read the book.

Helen Hanson:

Are you kind of busy person, only have 10 or even 15 minute in your day time to upgrading your mind skill or thinking skill actually analytical thinking? Then you are receiving problem with the book when compared with can satisfy your short period of time to read it because this time you only find e-book that need more time to be go through. Human Friendly Mechatronics can be your answer mainly because it can be read by an individual who have those short time problems.

Ingrid Baumbach:

Many people spending their time period by playing outside along with friends, fun activity along with family or just watching TV all day every day. You can have new activity to enjoy your whole day by reading through a book. Ugh, do you think reading a book can definitely hard because you have to accept the book everywhere? It ok you can have the e-book, getting everywhere you want in your Smart phone. Like Human Friendly Mechatronics which is getting the e-book version. So , why not try out this book? Let's see.
