## **Multimedia Introduction to Programming Using Java** David Gries, Paul Gries

Although vital to modern software development, Java and object-oriented programming can pose significant challenges to newcomers. This text, unique in both scope and approach and accompanied by interactive content that you may find on [extras.springer.com](https://extras.springer.com), addresses that learning curve by providing a careful, classroom-tested presentation of Java -- from the fundamentals of variables, types, and expressions to procedural concepts like loops and sophisticated object-oriented ideas. Multimedia Introduction to Programming Using Java anchors its pedagogy in the program ProgramLive that you may find at [extras.springer.com](https://extras.springer.com), a complete multimedia module in itself. Containing over 250 recorded lectures with synchronized animation, ProgramLive allows users to see, first-hand and in real time, processes like stepwise refinement of algorithms, development of loops, execution of method calls and associated changes to the call stack, and much more. The zip file also includes all programs from the book, 35 guided instruction sets for closed lab sessions, and a 70-page hyperlinked glossary. Additional key features of this work: Provides clear and accessible treatment of all aspects of a first course, along with more advanced topics such as recursion, exceptions, interfaces, inner classes, and GUIs. Introduces objects and classes early in the exposition, rendering object-oriented programming intuitive and natural. Develops programs, rather than simply showcasing them. Supports all concepts through complementary lectures on the zip-file featured on [extras.springer.com](https://extras.springer.com). Contains numerous self-help exercises that encourage readers to practice programming. Emphasizes rigor and accuracy through user-friendly exposition and a flexible organizational style. With its comprehensive appendices and bibliography, systematic approach, and helpful interactive programs on [extras.springer.com](https://extras.springer.com), this exciting work provides the key tools they needed for successful object-oriented programming. It is ideal for use at the undergraduate and graduate beginning level, whether in the classroom or for distance learning; furthermore, the text will also be a valuable self-study resource or reference volume in any programmer's library.

### **From reader reviews:**

#### **Robert Crumrine:**

Do you have something that you want such as book? The reserve lovers usually prefer to select book like comic, limited story and the biggest an example may be novel. Now, why not attempting Multimedia Introduction to Programming Using Java that give your fun preference will be satisfied by simply reading this book. Reading behavior all over the world can be said as the means for people to know world better then how they react in the direction of the world. It can't be explained constantly that reading practice only for the geeky man or woman but for all of you who wants to end up being success person. So , for all you who want to start studying as your good habit, you are able to pick Multimedia Introduction to Programming Using Java become your current starter.

#### **Harley Fabry:**

Beside this specific Multimedia Introduction to Programming Using Java in your phone, it can give you a way to get nearer to the new knowledge or info. The information and the knowledge you might got here is fresh from your oven so don't become worry if you feel like an old people live in narrow village. It is good thing to have Multimedia Introduction to Programming Using Java because this book offers for you readable information. Do you often have book but you seldom get what it's exactly about. Oh come on, that would not happen if you have this with your hand. The Enjoyable set up here cannot be questionable, similar to treasuring beautiful island. Techniques you still want to miss the idea? Find this book and also read it from today!

#### **Amy Medina:**

You may get this Multimedia Introduction to Programming Using Java by browse the bookstore or Mall. Simply viewing or reviewing it might to be your solve challenge if you get difficulties for ones knowledge. Kinds of this reserve are various. Not only simply by written or printed but additionally can you enjoy this book by e-book. In the modern era similar to now, you just looking by your local mobile phone and searching what your problem. Right now, choose your current ways to get more information about your book. It is most important to arrange yourself to make your knowledge are still revise. Let's try to choose proper ways for you.

#### **David Smith:**

A number of people said that they feel weary when they reading a publication. They are directly felt the item when they get a half portions of the book. You can choose the actual book Multimedia Introduction to Programming Using Java to make your own personal reading is interesting. Your personal skill of reading skill is developing when you similar to reading. Try to choose simple book to make you enjoy you just read it and mingle the sensation about book and looking at especially. It is to be 1st opinion for you to like to wide open a book and examine it. Beside that the guide Multimedia Introduction to Programming Using Java can

to be your brand-new friend when you're feel alone and confuse with the information must you're doing of these time.
