**Natural Products Chemistry: Sources, Separations and Structures** Raymond Cooper, George Nicola

Notoriously cumbersome to isolate and challenging to synthesize, the path of natural products to viable drugs is an arduous journey. Yet compounds isolated from nature may possess fascinating structures, biological profiles and pharmaceutical potential far greater than anything made by man. **Natural Products Chemistry: Sources, Separations and Structures** presents a practical guide to sourcing, isolating, and discovering new compounds from nature many of which become pharmaceutical drugs. This book emphasizes the challenges and advantages of products acquired from nature, compared to those obtained from combinatorial chemistry.

A basic introduction, the book describes the whole cycle from farm to final compound, backed up by case studies drawn from industry and research applications. It broadens the scope of applications and draws upon examples from various sources. Natural products chemistry, as taught today, draws its examples mainly from marine chemistry or plant chemistry; however, there is also a fascinating and rich world of fermented (microbial and algal) products leading to complex structures. Thus, the book draws upon examples from the microbial world and from insects too. Therefore, this is a source of bioactive metabolites, not traditionally available in academic settings, more the mainstay of the pharmaceutical industry.

Providing a roadmap of the process of collecting a compound from nature, isolating the active ingredient, and determining the chemical structure, this book provides a unique approach to the world of natural products.

### **From reader reviews:**

#### **Gonzalo Barnes:**

Book is definitely written, printed, or descriptive for everything. You can recognize everything you want by a guide. Book has a different type. To be sure that book is important thing to bring us around the world. Next to that you can your reading ability was fluently. A publication Natural Products Chemistry: Sources, Separations and Structures will make you to be smarter. You can feel considerably more confidence if you can know about anything. But some of you think this open or reading any book make you bored. It is not necessarily make you fun. Why they can be thought like that? Have you looking for best book or appropriate book with you?

#### **Joseph Thomas:**

In this 21st hundred years, people become competitive in every single way. By being competitive today, people have do something to make these people survives, being in the middle of typically the crowded place and notice by means of surrounding. One thing that occasionally many people have underestimated the idea for a while is reading. That's why, by reading a reserve your ability to survive raise then having chance to stand than other is high. For yourself who want to start reading some sort of book, we give you this specific Natural Products Chemistry: Sources, Separations and Structures book as basic and daily reading reserve. Why, because this book is usually more than just a book.

#### **Mattie Martin:**

The actual book Natural Products Chemistry: Sources, Separations and Structures has a lot associated with on it. So when you make sure to read this book you can get a lot of benefit. The book was written by the very famous author. The author makes some research before write this book. This book very easy to read you will get the point easily after reading this book.

#### **Mark Klein:**

This Natural Products Chemistry: Sources, Separations and Structures is great publication for you because the content which is full of information for you who always deal with world and get to make decision every minute. That book reveal it facts accurately using great plan word or we can say no rambling sentences in it. So if you are read this hurriedly you can have whole info in it. Doesn't mean it only gives you straight forward sentences but hard core information with wonderful delivering sentences. Having Natural Products Chemistry: Sources, Separations and Structures in your hand like obtaining the world in your arm, data in it is not ridiculous a single. We can say that no publication that offer you world throughout ten or fifteen tiny right but this e-book already do that. So , this really is good reading book. Heya Mr. and Mrs. hectic do you still doubt this?
