Computer-Aided Scheduling of Public Transport (Lecture Notes in Economics and Mathematical Systems)

Computer-Aided Scheduling of Public Transport (Lecture Notes in Economics and Mathematical Systems)

This proceedings volume consists of selected papers presented at the Eighth International Conference on Computer-Aided Scheduling of Public Transport (CASPT 2000), which was held at the conference center of the Konrad Adenauer-Foundation in Berlin, Germany, from June 21 to 23, 2000. The CASPT 2000 is the continuation of a series of international workshops and conferences presenting recent research and progress in computer-aided scheduling in public transport. Previous workshops and conferences were held in • Chicago (1975), • Leeds (1980), • Montreal (1983 and 1990), • Hamburg (1987), • Lisbon (1993) and • Cambridge, Mass. (1997).¹ With CASPT 2000, our series of workshops and conferences celebrated its 25 anniversary. Starting with a Workshop on Automated Techniques for Scheduling of Vehicle Operators for Urban Public Transportation Services in 1975 the scope and purpose has broadened since and still continues to do so. The previous workshops and conferences were focused on public mass transit, and while this remained the primary focus of the 2000 conference, it included also computer-aided scheduling methods being developed and applied in related means of passenger transport systems. Commonalities regarding operations research techniques such as, e.g., column generation techniques and 1 While there were no formal proceedings for the first workshop but only a printed copy of all papers issued to participants on arrival, the subsequent ones are well documented as follows: Wren, A. (Ed.) (1981). Computer Scheduling of Public Transport. North Holland, Amsterdam.

From reader reviews:

Bobbi Brunner:

Book is actually written, printed, or outlined for everything. You can recognize everything you want by a publication. Book has a different type. As it is known to us that book is important issue to bring us around the world. Close to that you can your reading expertise was fluently. A publication Computer-Aided Scheduling of Public Transport (Lecture Notes in Economics and Mathematical Systems) will make you to possibly be smarter. You can feel much more confidence if you can know about almost everything. But some of you think that will open or reading a book make you bored. It is not necessarily make you fun. Why they may be thought like that? Have you in search of best book or suited book with you?

Juana Rummel:

Are you kind of stressful person, only have 10 or maybe 15 minute in your moment to upgrading your mind skill or thinking skill actually analytical thinking? Then you have problem with the book in comparison with can satisfy your short period of time to read it because all this time you only find reserve that need more time to be examine. Computer-Aided Scheduling of Public Transport (Lecture Notes in Economics and Mathematical Systems) can be your answer since it can be read by anyone who have those short extra time problems.

Debra Espiritu:

Is it a person who having spare time in that case spend it whole day through watching television programs or just telling lies on the bed? Do you need something new? This Computer-Aided Scheduling of Public Transport (Lecture Notes in Economics and Mathematical Systems) can be the response, oh how comes? A book you know. You are and so out of date, spending your extra time by reading in this new era is common not a nerd activity. So what these publications have than the others?

Mary Tobin:

As a college student exactly feel bored in order to reading. If their teacher requested them to go to the library in order to make summary for some e-book, they are complained. Just very little students that has reading's spirit or real their hobby. They just do what the instructor want, like asked to go to the library. They go to at this time there but nothing reading critically. Any students feel that examining is not important, boring and also can't see colorful pics on there. Yeah, it is for being complicated. Book is very important in your case. As we know that on this period of time, many ways to get whatever we would like. Likewise word says, ways to reach Chinese's country. Therefore , this Computer-Aided Scheduling of Public Transport (Lecture Notes in Economics and Mathematical Systems) can make you truly feel more interested to read.
