Ian H. Witten, Eibe Frank, Mark A. Hall

Data Mining: (Morgan Kaufmann Series in Data Management Systems) Ian H. Witten, Eibe Frank, Mark A. Hall

Data Mining: Practical Machine Learning Tools and Techniques offers a thorough grounding in machine learning concepts as well as practical advice on applying machine learning tools and techniques in real-world data mining situations. This highly anticipated third edition of the most acclaimed work on data mining and machine learning will teach you everything you need to know about preparing inputs, interpreting outputs, evaluating results, and the algorithmic methods at the heart of successful data mining.

Thorough updates reflect the technical changes and modernizations that have taken place in the field since the last edition, including new material on Data Transformations, Ensemble Learning, Massive Data Sets, Multi-instance Learning, plus a new version of the popular Weka machine learning software developed by the authors. Witten, Frank, and Hall include both tried-and-true techniques of today as well as methods at the leading edge of contemporary research.

*Provides a thorough grounding in machine learning concepts as well as practical advice on applying the tools and techniques to your data mining projects *Offers concrete tips and techniques for performance improvement that work by transforming the input or output in machine learning methods *Includes downloadable Weka software toolkit, a collection of machine learning algorithms for data mining tasks—in an updated, interactive interface. Algorithms in toolkit cover: data pre-processing, classification, regression, clustering, association rules, visualization

From reader reviews:

Martha Howell:

Within other case, little people like to read book Data Mining: (Morgan Kaufmann Series in Data Management Systems). You can choose the best book if you want reading a book. So long as we know about how is important some sort of book Data Mining: (Morgan Kaufmann Series in Data Management Systems). You can add know-how and of course you can around the world with a book. Absolutely right, simply because from book you can learn everything! From your country right up until foreign or abroad you will find yourself known. About simple issue until wonderful thing it is possible to know that. In this era, we can open a book as well as searching by internet system. It is called e-book. You may use it when you feel bored to go to the library. Let's go through.

Scott Foust:

As people who live in often the modest era should be change about what going on or information even knowledge to make these keep up with the era which can be always change and advance. Some of you maybe can update themselves by reading books. It is a good choice for you personally but the problems coming to an individual is you don't know what kind you should start with. This Data Mining: (Morgan Kaufmann Series in Data Management Systems) is our recommendation to cause you to keep up with the world. Why, because this book serves what you want and need in this era.

Byron Hiebert:

Spent a free the perfect time to be fun activity to accomplish! A lot of people spent their sparettime with their family, or their particular friends. Usually they undertaking activity like watching television, about to beach, or picnic from the park. They actually doing same task every week. Do you feel it? Do you want to something different to fill your own personal free time/ holiday? Could be reading a book can be option to fill your no cost time/ holiday. The first thing you will ask may be what kinds of book that you should read. If you want to try look for book, may be the reserve untitled Data Mining: (Morgan Kaufmann Series in Data Management Systems) can be good book to read. May be it might be best activity to you.

Josephine Weeks:

Do you like reading a reserve? Confuse to looking for your chosen book? Or your book was rare? Why so many concern for the book? But any kind of people feel that they enjoy for reading. Some people likes reading, not only science book but novel and Data Mining: (Morgan Kaufmann Series in Data Management Systems) as well as others sources were given knowledge for you. After you know how the truly great a book, you feel desire to read more and more. Science publication was created for teacher as well as students especially. Those textbooks are helping them to bring their knowledge. In various other case, beside science e-book, any other book likes Data Mining: (Morgan Kaufmann Series in Data Management Systems) to make your spare time more colorful. Many types of book like this one.
