Field Ionization Mass Spectrometry: International Series of Monographs in Analytical Chemistry (Monographs in Analysis Chemistry)

Hans-D. Beckey

Field Ionization Mass Spectrometry: International Series of Monographs in Analytical Chemistry (Monographs in Analysis Chemistry) Hans-D. Beckey

Field Ionization Mass Spectrometry focuses on developments in field ionization (FI) mass spectrometry and describes its applications in physical chemistry, with emphasis on mass spectrometric problems. Physico-chemical problems as well as problems of chemical analysis are considered based on issues such as the probability of field ionization; field dissociation and charge distribution; kinetics of ion decomposition in high fields; negative ions; surface diffusion; activation of FI emitters; and elucidation of the structures of organic compounds.

This book is comprised of four chapters and begins with a short review on some of the most important directions of research in FI mass spectrometry. Two main fields of research are discussed: physico-chemical investigations and quantitative analysis or structural determination of organic substances. The next chapter is devoted to focusing and non-focusing sources of FI and covers topics such as methods for production of FI tips and thin wires, together with the use of tips and carbon filaments as FI emitters. The last two chapters focus on the application of the FI mass spectrometer to physico-chemical problems and to quantitative analysis of homologous series of organic substances such as alkanes, alkenes, alkynes, amines, and alcohols. This monograph is intended primarily for chemists and mass spectrometrists.

From reader reviews:

James Flynn:

Within other case, little individuals like to read book Field Ionization Mass Spectrometry: International Series of Monographs in Analytical Chemistry (Monographs in Analysis Chemistry). You can choose the best book if you'd prefer reading a book. Given that we know about how is important a book Field Ionization Mass Spectrometry: International Series of Monographs in Analytical Chemistry (Monographs in Analysis Chemistry). You can add understanding and of course you can around the world by just a book. Absolutely right, because from book you can realize everything! From your country until eventually foreign or abroad you can be known. About simple matter until wonderful thing you may know that. In this era, we can easily open a book or maybe searching by internet product. It is called e-book. You should use it when you feel fed up to go to the library. Let's go through.

Ellen Kelsey:

Information is provisions for folks to get better life, information nowadays can get by anyone in everywhere. The information can be a knowledge or any news even a huge concern. What people must be consider any time those information which is in the former life are challenging be find than now is taking seriously which one works to believe or which one often the resource are convinced. If you get the unstable resource then you obtain it as your main information it will have huge disadvantage for you. All those possibilities will not happen in you if you take Field Ionization Mass Spectrometry: International Series of Monographs in Analytical Chemistry (Monographs in Analysis Chemistry) as the daily resource information.

William Emmer:

Playing with family in a park, coming to see the water world or hanging out with buddies is thing that usually you may have done when you have spare time, after that why you don't try point that really opposite from that. One particular activity that make you not experience tired but still relaxing, trilling like on roller coaster you have been ride on and with addition of information. Even you love Field Ionization Mass Spectrometry: International Series of Monographs in Analytical Chemistry (Monographs in Analysis Chemistry), you are able to enjoy both. It is great combination right, you still need to miss it? What kind of hang type is it? Oh come on its mind hangout guys. What? Still don't buy it, oh come on its identified as reading friends.

Ola Hellman:

That e-book can make you to feel relax. This particular book Field Ionization Mass Spectrometry: International Series of Monographs in Analytical Chemistry (Monographs in Analysis Chemistry) was colorful and of course has pictures on the website. As we know that book Field Ionization Mass Spectrometry: International Series of Monographs in Analytical Chemistry (Monographs in Analysis Chemistry) has many kinds or style. Start from kids until teens. For example Naruto or Investigator Conan

you can read and feel that you are the character on there. Therefore not at all of book usually are make you bored, any it makes you feel happy, fun and rest. Try to choose the best book for yourself and try to like reading that will.
