Security-aware Cooperation in Cognitive Radio Networks (SpringerBriefs in Computer Science)

Ning Zhang, Jon W. Mark

Security-aware Cooperation in Cognitive Radio Networks (SpringerBriefs in Computer Science) Ning Zhang, Jon W. Mark

This brief investigates spectrum efficient and energy efficient strategies, known as cognitive radio networks (CRNs), to ensure secure cooperation between licensed and unlicensed users. The authors address issues of spectrum scarcity, spectrum sensing, transmission performance, trust-aware cooperation, and secure communications.

Two security-aware cooperation based spectrum access schemes are presented. The first is a trust-aware cooperative framework for CRNs to improve the throughput or energy efficiency of licensed users and offer transmission opportunities to unlicensed users, taking into consideration the trustworthiness of unlicensed users. The second scheme is a cooperative framework to enhance secure communications of licensed users. An introduction to CRNs and literature survey enhance the discussion while numerical results are provided to demonstrate the viability of the proposed schemes.

The brief is designed for researchers and professionals working with cognitive radio networks or interested in cooperation based access. Advanced-level students studying computer communication networks and communications engineering will also find this brief useful.

From reader reviews:

Thad Whitehead:

Information is provisions for those to get better life, information presently can get by anyone with everywhere. The information can be a knowledge or any news even an issue. What people must be consider whenever those information which is inside the former life are challenging to be find than now is taking seriously which one would work to believe or which one the particular resource are convinced. If you obtain the unstable resource then you obtain it as your main information you will have huge disadvantage for you. All of those possibilities will not happen within you if you take Security-aware Cooperation in Cognitive Radio Networks (SpringerBriefs in Computer Science) as the daily resource information.

Kenneth Williams:

Reading a book can be one of a lot of exercise that everyone in the world really likes. Do you like reading book thus. There are a lot of reasons why people enjoy it. First reading a book will give you a lot of new details. When you read a book you will get new information due to the fact book is one of a number of ways to share the information or their idea. Second, reading through a book will make you more imaginative. When you studying a book especially tale fantasy book the author will bring you to definitely imagine the story how the characters do it anything. Third, you can share your knowledge to some others. When you read this Security-aware Cooperation in Cognitive Radio Networks (SpringerBriefs in Computer Science), you can tells your family, friends and also soon about yours guide. Your knowledge can inspire others, make them reading a guide.

Elliott Preciado:

This Security-aware Cooperation in Cognitive Radio Networks (SpringerBriefs in Computer Science) is great guide for you because the content which is full of information for you who all always deal with world and have to make decision every minute. This specific book reveal it facts accurately using great manage word or we can state no rambling sentences inside it. So if you are read the item hurriedly you can have whole facts in it. Doesn't mean it only provides you with straight forward sentences but hard core information with wonderful delivering sentences. Having Security-aware Cooperation in Cognitive Radio Networks (SpringerBriefs in Computer Science) in your hand like keeping the world in your arm, information in it is not ridiculous one particular. We can say that no book that offer you world within ten or fifteen tiny right but this reserve already do that. So , this is good reading book. Hey there Mr. and Mrs. stressful do you still doubt that?

Kenneth Sigler:

In this age globalization it is important to someone to find information. The information will make professionals understand the condition of the world. The fitness of the world makes the information much easier to share. You can find a lot of sources to get information example: internet, magazine, book, and soon.

You will see that now, a lot of publisher this print many kinds of book. The book that recommended for you is Security-aware Cooperation in Cognitive Radio Networks (SpringerBriefs in Computer Science) this guide consist a lot of the information with the condition of this world now. This specific book was represented how can the world has grown up. The words styles that writer require to explain it is easy to understand. The actual writer made some study when he makes this book. Honestly, that is why this book suitable all of you.
