This book/DVD set is a thoroughly illustrated "how-to" guide to facial fat transfer, a new facial rejuvenation procedure that allows the surgeon to sculpt the face and restore it to its natural beauty. Fat is harvested from fattier areas of the body through a suction technique and injected into the face with a small cannula. The fat transferred becomes incorporated as living tissue and the results are extremely long lasting. The book guides readers through this procedure with easy-to-follow instructions and more than 200 full-color step-by-step illustrations.

Two DVDs accompanying the book contain videos demonstrating the procedure and pitfalls.
